

Divine energy clearing

to transform your space and life

Energy clearing is an ancient sacred practice that enhances our physical space by healing emotional and spiritual congestion (negative patterns, blockages, destructive influences) that disrupts our lives.

Traditional societies are attuned to the deep connection between people and their natural environments. Just as thoughts, emotions and actions leave an imprint on the soul, they also leave a residue left in our brains and bodies. Sometimes these past events can be so negative they undermine your health, finances and relationships.

Energy clearing cleans out these dark and destructive forces, balances the energy and allows free flowing energy to support of your health, abundance and success.

Onye Onyemaechi is a gifted African seer who has the power to see into both the visible and intangible realms. Tapping into the universal Divine Grace, Onye is able to clear blockages and to help resolve past and present issues to promote the foundation for a blessed and successful future.

Our home was repeatedly broken into when it was being remodeled. Thieves stole our televisions, our household goods and finally a love seat. We put in an alarm system, we upgraded our alarm system, and we changed and upgraded our locks, The scoundrels simply became more sophisticated. Finally we called in Onye. He created an energy clearing and house blessing specifically for our home. We haven't had any trouble since. D.W.
